Banque Richelieu

Press Release - Paris, July 16th 2026

Group Banque Richelieu reaches EUR 11 billion in assets under management and posts remarkable financial strength

Group Banque Richelieu confirms its ambition to become a leading player in international wealth management. The Group has not only reached a symbolic milestone but has also consolidated its growth through strategic transactions - notably the acquisition of its Swiss subsidiary and the launch of Richelieu Invest - while demonstrating remarkable financial strength. This momentum charts the course for ambitious development in the years ahead.

Group Banque Richelieu continues its growth trajectory. Assets under management reached the EUR 11 billion mark as at 30 June 2026, driven by steadily rising net inflows and confirming the Group's standing as a recognized player in wealth management.

"This milestone is a significant step for our Group: it confirms that the strategy we have pursued - a multi-entity model, anchored in four leading financial centers and serving an international clientele - is meeting the expectations of the families, entrepreneurs and institutions that place their trust in us. The acquisition of Banque Richelieu Switzerland in Zurich and the creation of Richelieu Invest illustrate our determination to broaden our platform while enhancing the coherence of our offering" **says Sylvain Fondeur, Chief Executive Officer of Group Banque Richelieu.**

As at the end of June 2026, the consolidated solvency ratio stood at 25%, with own funds rising steadily to reach EUR 230 million, alongside an LCR of 355% and an NSFR of 170%, a very solid prudential and liquidity base, well above regulatory requirements, which forms the foundation of the Group's development and of its capacity to seize new growth opportunities.

"Our robust financial results, combined with a high solvency ratio and very comfortable liquidity ratios, give us the means to pursue an ambition geared towards EUR 15 billion in assets under management over a three-year horizon. We intend to sustain our trajectory of profitable growth, accelerate our synergies, invest in our teams by embedding the Group in a far-reaching internal AI transformation, and seize development opportunities - both organic and external - that are built to last" adds Sylvain Fondeur.

Group Banque Richelieu's outlook for the coming months remains consistent with the development model already under way: continued organic business growth, the strengthening of teams and partnerships, and the selective review of any external growth opportunity - across all of the Group's geographies - capable of consolidating its positioning.
